22 Apr 2010 07:52 GMT

0752 GMT [Dow Jones] -- *Nestle's (NESN.VX) 1Q figures are well balanced, with every category and region in positive territory, independent food industry analyst James Amoroso says. "Growth is even coming from the previously weak areas, such as Europe and Waters," he adds. The less-than-targeted growth at Nutrition may pass for a disappointment, but the overall picture remains favorable, says Amoroso.* Shares +1.6% at CHF52.85.
